Other water (identify type)

DISTRICT OFFICE:

ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite): The proposed project is to repair the erosion on the highway embankment inslopes with grading and placement of riprap. Riprap will be placed along 550 feet of the southwest edge of the lake. Stink Lakes is located within an isolated basin that does not have any hydrologic connection to other waters of the US. The NWI, USGS Quad. maps, aerial photos and site visit were used to make the determination. The water body/ waterway is not navigable and has no valid ICC.
